Our Certificate

Capital Industries

About us

Capital Industries is equipped with the capabilities to provide a range of options for every unique die-cut project need. Made from various non-printed materials, die-cut components are cut into different shapes to solve specific problems such as sound dampening, EMI/RFI shielding, electrical insulation, thermal management, bonding, gap filling, sealing, air flow, and overheating.

With industry experience in electronics, medical devices, and more, Capital Industries engineering team can help resolve your design challenges with an array of die-cut fabrication methods and materials so you can get your product into production and on the market.

At Capital Industries we provide multiple types of tooling processes including steel rule die, chemical etch die, rotary tooling, drag knife, CNC router, water jet, and Class-A (steel). Each method is available to determine which may be the best fit for your unique project.

Client' Review

Mia McBride

The best part about Amwerk is that you work with such passionate people who are eager to solve challenges. I love that I get to work with people from all over the world and from a variety of different cultures who are dedicated and enjoy their job.

Our Mission

Over the years, we've built a culture of service, teamwork, and innovation. With an exceptionally diverse staff and an average tenure of ten years, we are proud that people choose to build their careers with us.

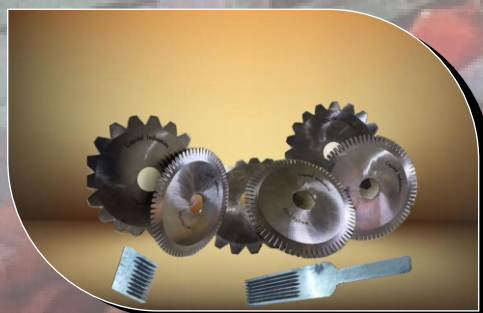

Our Services

"Delivering top-notch iron solutions: manufacturing, fabrication, welding, and custom designs. Strength and durability for every project."

our Products

Industrial Blade & Cutters

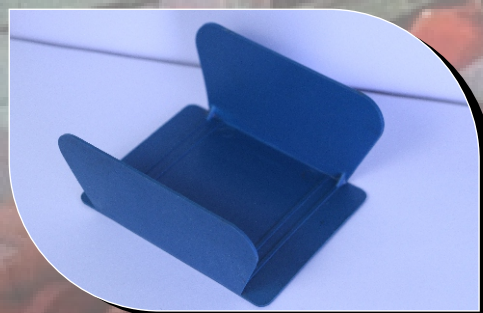

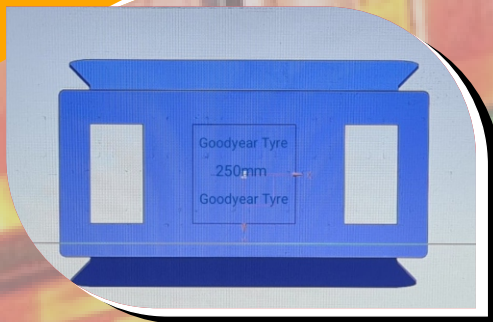

About

Industrial blades and cutters are specialized tools designed for cutting, slicing, and shaping various materials in manufacturing and production processes. They are widely used in industries such as paper, plastics, textiles, food processing, and metal fabrication. These blades are made from high-grade materials like stainless steel or carbide to ensure durability and precision. Customization options are available to meet specific industrial requirements.

our Products

Spacers

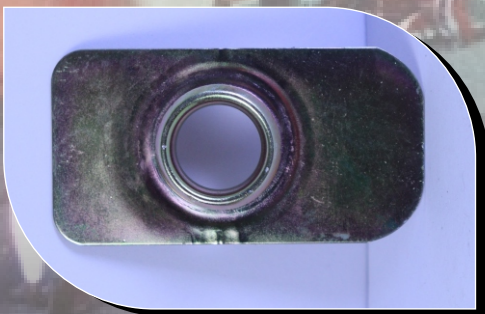

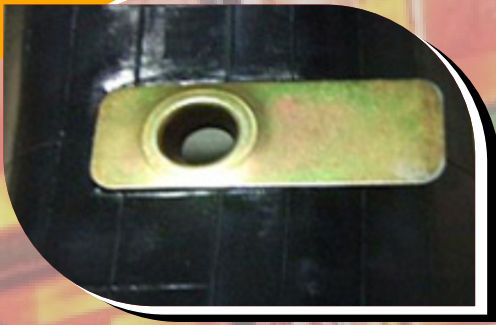

About

Spacers are specialized components used in tire manufacturing to maintain precise spacing between tire layers during production. They ensure uniformity and structural integrity, enhancing tire performance and durability. Typically made from durable materials like rubber or plastic, they withstand high pressures and temperatures. Spacers are crucial for maintaining quality standards in tire production. They contribute to safer and more efficient tires for various vehicles.

our Products

Metal Flap Protectors

About

A metal flap protector for tires, often used in heavy-duty vehicles, is designed to shield the tire from debris and damage. The serial number on such a protector is typically engraved or stamped on the metal surface, usually along the edge or on a flat section for easy identification. This serial number helps in tracking the product for warranty, maintenance, or replacement purposes. It may include information about the manufacturer, production date, and specific model. Always refer to the manufacturer's documentation for precise details on locating and interpreting the serial number.

our Products

Tyre Serial Number

About

A Tyre Serial Number, also known as a DOT number, is a unique code imprinted on the sidewall of a tyre for identification. It typically includes information about the manufacturer, plant location, tyre size, and production date. The last four digits of the serial number indicate the week and year the tyre was manufactured. This number is crucial for tracking recalls, ensuring safety, and verifying tyre age.

Our Clients

Capital Industries

Capital Industries is a diversified company involved in various sectors such as manufacturing, technology, and services. Known for its innovative approach, the company focuses on delivering high-quality products and solutions to meet customer needs. With a strong emphasis on sustainability, Capital Industries integrates eco-friendly practices into its operations. The company has a global presence, serving clients across multiple continents. It invests heavily in research and development to stay ahead in competitive markets. Capital Industries also prioritizes employee welfare, fostering a culture of growth and inclusivity. Its commitment to excellence has earned it a reputation as a reliable and forward thinking organization.
